
Blue Abyss Safari Tour Activity Pack

Key Facts

Circle words you don't understand and write them below. You can ask your teacher to explain them and write the meaning.

Coral Reefs

- There are a lot of underwater animals that live in coral reefs.
- Coral reefs are made of tiny coral creatures.
- These tiny coral creatures stick to the ocean floor and grow hard shells that keeps them safe.
- Corals are brightly coloured. They can be red, yellow, purple, and even pink!
- Corals normally live in warm water, but some have been found in cold water too!
- Some coral reefs stop big waves from crashing into the land.
- Coral lives for a very long time!

Write down words you don't know here – then ask your teacher about them:

Sharks

- There are many different types of shark.
- A shark has a better sense of smell than a human. They can smell food from really far away.
- Sharks have been on Earth since the time of the dinosaurs.
- Sharks have more than one row of teeth!
- Most sharks live to be 30 years old, but some can live even longer!
- Some sharks have to keep swimming all the time – even while they sleep!

The Amazon Rainforest

- The Amazon is the world's biggest rainforest.
- Inside the rainforest is the Amazon River, which is the biggest in the world!
- Different types of birds, fish, and other animals live in the Amazon Jungle.
- It is always dark in the Amazon Rainforest, because there are so many leaves on the trees that block the light from the sun.
- The Amazon River is so long, it once took a man 66 days to swim all the way down it.
